

Exegy DMA Platform

Award-winning fully-managed and hosted order entry and execution infrastructure that simplifies the complexity of accessing global liquidity

Solution Overview

- » The DMA Platform is a fully-managed and hosted order routing solution providing ultra-low latency market access while reducing cost of ownership and time-to-market.
- » All gateways are deployed in exchange co-locations to support ultra-low latency trading and direct market access.
- » All infrastructure components are designed to minimize latency with the full end-to-end stack tuned for performance.
- » The DMA Platform simplifies your exchange connectivity and order routing through one unified API.
- » Full risk management system provides regulatory compliant controls with support for MiFID II and SEC Rule 15c3-5.
- » Brokers and sell-side institutions are onboarded to the risk API in order to fully manage buy-side client order flow on pre-trade basis.
- » Clients can also manage risk on their own order books within the confines of the broker-imposed limits.
- » All components are fully managed by Exegy’s award-winning managed services team including all bug fixes, upgrades, and exchange-driven changes.
- » Exegy operates a follow-the-sun support model with hubs in New York, Belfast, London, and Manila to ensure subject matter experts are available 24x7 and production impacting issues can be worked on until resolution.

Fast Facts:

DMA Platform

- » Built for speed to help achieve quality execution and superior fill ratios
- » Quick access to new markets as required with support for 40+ global listed derivatives and fixed income venues via a single API
- » Meets the trading needs of buy-side firms and sell-side brokers
- » Deployed and available in major exchange co-location sites globally
- » Broker neutral and can be integrated with most trading screens and back-office solutions
- » Onboarded by 20+ brokers and clearing firms
- » Client-side APIs include FIX 4.4 and 5.0 and Exegy API
- » Our API is a multithreaded and asynchronous binary API designed for speed

Risk Management

- » Central risk management API and screen for low latency pre-and post-trade risk checks
- » Brokers can manage risk and order flow with tiered limit controls for brokers, clearing firms, and trading firms
- » Order and trade FIX drop copies, allowing sponsored access partners to monitor in real time
- » Kill switch for immediate cancels at trader and firm levels
- » FIX Drop Copies are compliant with MiFID II

About Exegy®, Inc.

Exegy is a global leader in low-latency market data, execution technology, trading platforms, and predictive signals. Backed by Marlin Equity Partners, Exegy serves as a strategic partner to the complete ecosystem of the buy side, sell side, exchanges, and ISV/technology firms around the globe.

At the heart of Exegy solutions are fully managed, high-performance, and scalable solutions powered by purpose-built appliances, hardware-acceleration, artificial intelligence, enterprise software, and service automation technologies derived from our extensive patent portfolio.

Headquartered in St. Louis with regional offices in the US, UK, and Asia Pacific regions, Exegy has the global footprint to deliver world-class support and managed services to its customer base.
